The patent term extension is 0 days. Any patent to issue from the above identified application will include an indication of the 0 day extension on the front page.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term extension is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

1. The following changes to the drawings are required by the examiner: labels are required for the boxes of Figs. 1, 3, 4 as per 37 C.F.R. 1.83(a). In order to avoid abandonment of the application, applicant must make these drawing changes.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach a processing mechanism for processing unprocessed micro devices into processed micro devices comprising a pin driver module for routing address, data and control signals to a backplane module and provide a first plurality of voltages to the backplane module, the backplane module routing the address, data and control signals and providing a second plurality of voltages to at least one socket wherein the unprocessed micro device is placed;

nor does the prior art teach a buffer circuit for a processing mechanism capable of processing unprocessed micro devices into processed micro devices comprising a digital-to-analog converter to generate a first variable DC voltage, an amplifier responsive to the DC voltage to generate a second variable DC voltage, and a level-shifting translating buffer for transferring data signals from a processor to the unprocessed micro devices and for transferring the device data signals from the processed micro devices to the processor, the buffer responsive to a voltage and the second variable DC voltage to provide a plurality of logic levels for the device data signals;

nor does the prior art teach a method for programming a programmable micro device comprising providing a first address from a processor, providing a first data corresponding to the

Art Unit: 2185

first address, and providing a control signal to enable the micro device to accept the data at a memory location identified by the first address;

nor does the prior art teach a method for reading a programmable micro device comprising providing a first address from a processor to the micro device and providing a control signal from the processor to the micro device to enable the device to provide a first data from a memory location identified by the first address;

nor does the prior art teach a programming mechanism capable of programming unprogrammed micro devices into programmed micro devices comprising a plurality of sockets for placement of processed micro devices, a plurality of data buffer/registers, each coupled to a socket for receiving a first data, a plurality of compare circuits having one input coupled to a respective buffer/register, an expected data register coupled to the second input of a respective compare circuit, and a processor coupled to the output of each of the plurality of compare circuits, wherein each compare circuit provides a first logic level when the first data matches the first expected data, and provides a second logic level when the first data does not match the first expected data;

nor does the prior art teach a method for verifying data programmed in a plurality of programmed micro devices comprising providing to each of a plurality of data buffer/registers a first data stored in each of the plurality of programmed micro devices, providing the first data to a first input of a plurality of compare circuits, providing a first expected data from an expected data register to a second input of each of the plurality of compare circuits, comparing the first data

with the first expected data, outputting a first logic level from one of the compare circuits when the first data matches with the first expected data, and outputting a second logic level from one of the compare circuits when the first data does not match with the first expected data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
